UNDERGROUND INFRASTRUCTURE INSPECTION

Helping Build a Stronger Future

Inspect · Maintain · Protect

CCTV, push-camera, and 360° inspection for municipalities, buildings, and homes. Based in Golden Lake. Serving Eastern Ontario.

See the underground clearly enough to act before it fails.

Nexus Future Technologies Inc. is a Canadian inspection practice built around CCTV mainline work, push-camera laterals, 360° manhole imaging, and leak-prevention repair. We keep particular care for smaller communities — modern records for aging maps.

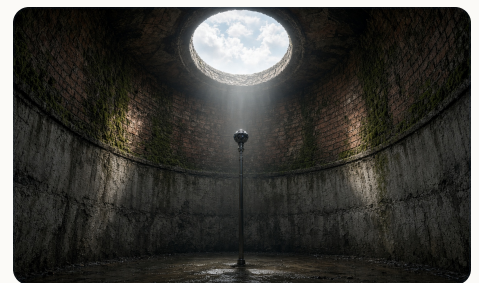

CCTV mainline inspection

A-150 mainline camera work that records cracks, roots, joints, and blockages — a living map of the asset, without tearing up the street.

Push camera & laterals

Laterals and smaller-diameter lines inspected on a two-hour minimum. Fast scheduling for homes, buildings, and contractor tie-ins.

360° structures & parging

Full-chamber imaging of manholes, plus leak-prevention parging and grouting quoted per structure so infiltration is stopped at the source.

Municipalities

Affordable annual programs for townships asked to do more with less.

Property managers

Documented mainline condition that protects the building and the capital plan.

Homeowners

See the line before it backs up — while the fix is still small.

Contractors

Camera work and reports you can hand to the owner or the engineer.

2026 Product & Service Rate Sheet

List rates for 2026. Project-specific quotes supersede this sheet.

Service	Unit	Rate
CCTV Inspection Report	Per job	\$255.00
CCTV Inspection (A-150) Mainline camera inspection · 4-hour minimum	Per hour	\$315.00
Push Camera Inspection Laterals and smaller-diameter lines · 2-hour minimum	Per hour	\$155.00
Pre-Job Assessment Site review, software map planning, and mobilization	Per job	\$300.00

Additional services

- Structure repair / parging / grouting — quoted per project upon request.
- Hydro flushing — quotes provided upon request.
- 360° manhole / structure inspection — quoted per structure.
- Long-term and standing rates — available upon request for municipal and multi-year work.

Terms

- A-150 mainline inspection carries a four-hour minimum.
- Push camera inspection carries a two-hour minimum.
- Applicable taxes are extra. Rates are subject to change.
- Travel is billed door-to-door. A fuel surcharge applies to all equipment.
- Valid for 2026. Project-specific quotes supersede list rates.

Ready to inspect.
